Things you need to know

All funds carry some risk and you should consider these risks before making an investment decision. The value of investments and any income from them can fall as well as rise and will be reduced in real terms by the effects of inflation.

The main factors which may increase the risk of this fund include:

- The amount invested in company shares
- The split between government and corporate bonds
- The extent to which the fund invests in high yield assets
- The amount held in overseas assets
- Any concentration in specific areas or sectors

All or some of the investments are made through a reinsurance arrangement so if the linked life insurance company(ies) were to fail you may lose some or all of your money and this will not be covered by the Financial Services Compensation Scheme.
