Source: FE fundinfo as at 31/12/2022. Performance in the chart is shown up to and including the last working day of the current quarter. You shouldn't use past performance as a measure of future performance.

Fund performance data is based on a single price basis, net of fees and expenses deducted from the unit price. Other charges may apply, which are specific to individual plans.

What is the dealing cycle?

The fund is forward priced, which means that the member gets the next available price after they invest. The fund has a dealing cycle of T + 0. This means that the money received on day T buys units at the valuation date price applicable at close of business on the same day.

Things you need to know

All funds carry some risk and you should consider these risks before making an investment decision. The value of investments and any income from them can fall as well as rise and will be reduced in real terms by the effects of inflation.

The main factors which may increase the risk of this fund include:

- The amount invested in company shares
- The split between government and corporate bonds
- The extent to which the fund invests in high yield assets
- The amount held in overseas assets
- Any concentration in specific areas or sectors

All or some of the investments are made through a reinsurance arrangement so if the linked life insurance company(ies) were to fail you may lose some or all of your money and this will not be covered by the Financial Services Compensation Scheme.

We've based this information on our current understanding of law and practice. We make every effort to ensure that this information is helpful, accurate and correct, but it may change or may not apply to your personal circumstances.
